

The Rembrandt Van Rijn Website Assignment:

- Use a **fresh “boilerplate” set of files** to create a **three-page website** about Rembrandt and his significant lady friends.
- When ready, upload the **entire site folder** into your root directory and **name the folder “rembrandt.”** *Link to the site from your root index page and back again.*
- Create a link menu (nav section) at the TOP of each of the three Rembrandt pages so that the viewer can jump to either of the other two pages whenever they want.
- Use the “style.css” *in the Rembrandt site folder* to control the appearance of all three pages.
- Use the **images** and **text** provided for each of the three pages, BUT:
Find, download, optimize, and integrate AT LEAST ONE ADDITIONAL relevant IMAGE from the Internet (it’s not a copyright violation if it’s done for educational purposes).
- Be sure to add the **BLC logo** (png file provided) at the top or bottom of each page and **make the logo LINK TO THE BLC homepage.** How? just wrap the html img tag with a standard anchor tag, as follows...
``
- Replace the default **FAVICON** in the boilerplate files with one of your own design (see PPT04, pg8).
- Add the provided copyright statement to the bottom of all three pages
 - Use the following code for the **special copyright symbol character: ©**
- TIP: Do your best to design each page for *appearance* as well as functionality.

DEADLINE: Monday 11/10.
